

Xinhe Yu

Xinhe has two-year experiences in UI and data visualization area and has worked on projects in web design, branding & identity, data visualization, graphic and advertising. She has a BA in Communication and minor for Studio Art in the University of Colorado, Denver; MFA in Information Design and Visualization in Northeastern University. She is willing to learn and explore in both Communication and information visualizations via her working and learning experiences.

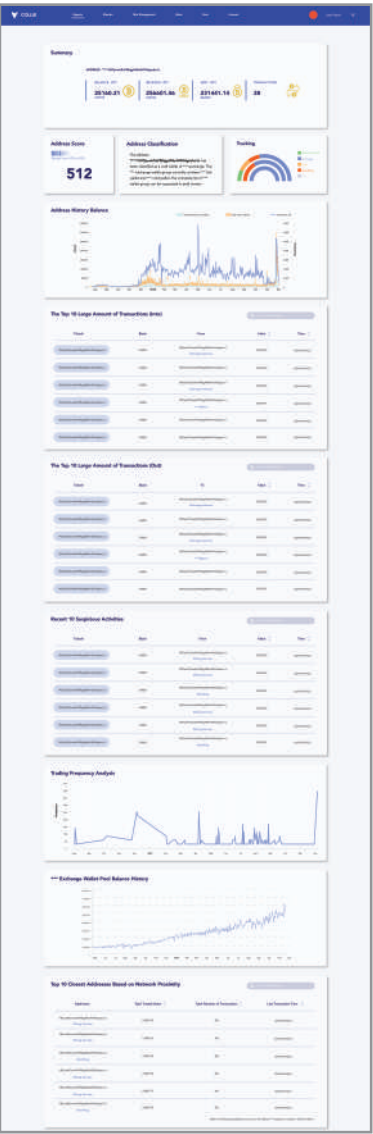

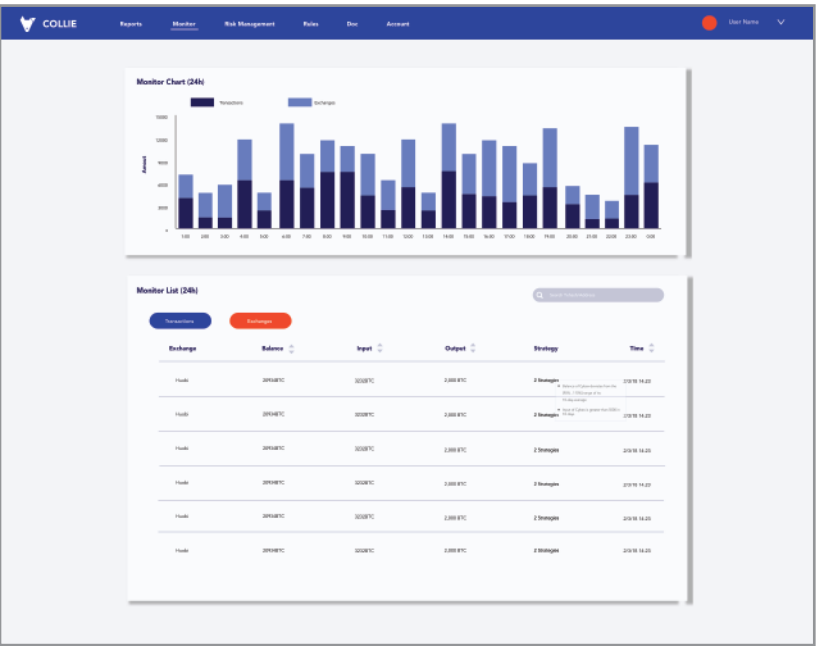

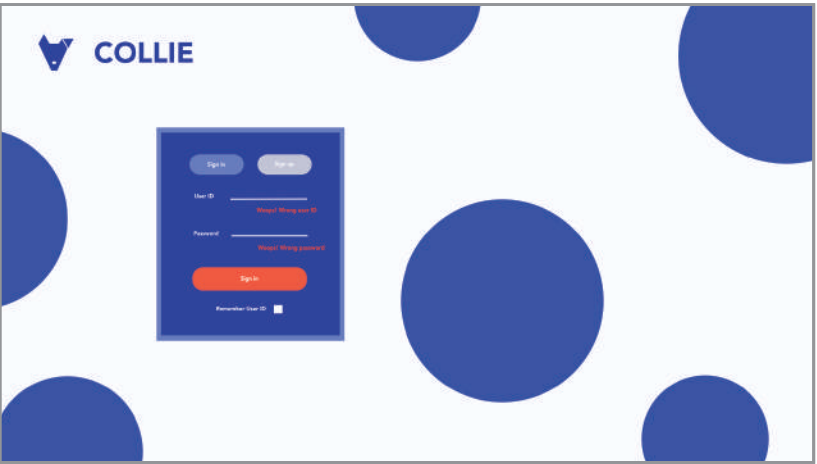

LongHash: Website and Mobile Re-design

LongHash’s data journalism platform uses narrative storytelling to help you make sense of the numbers. It publishes the original data and visualizations in English, Chinese and Japanese. It contains skills of both Data Visualizations and User Interface design.

COLLIE: Anti-Money Laundering Service

We are developing RegTech for blockchain via blockchain technology. Through blockchain big data and AI algorithm, we managed to build an AML algorithm for crypto that is no longer based on KYC. We are able to analyze the information behind the cryptocurrency comprehensively through our unique Beacon Technology, helping relevant institutions and governments better understand the situation of the global cryptocurrency and prevent potential crimes.

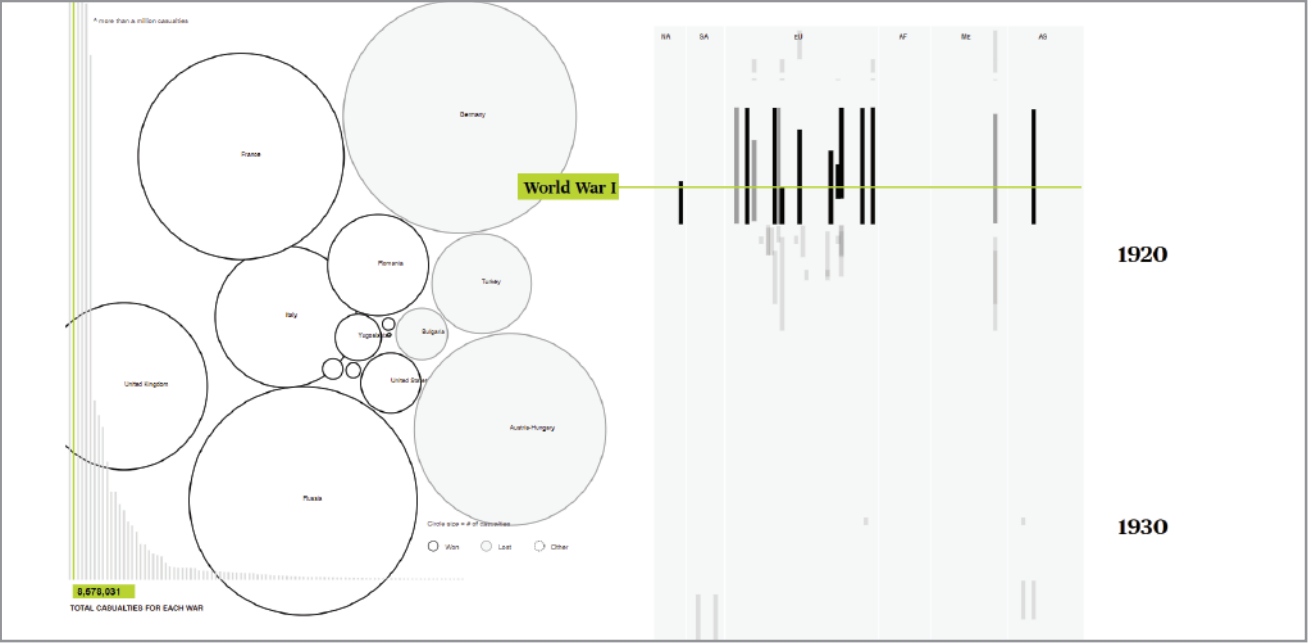

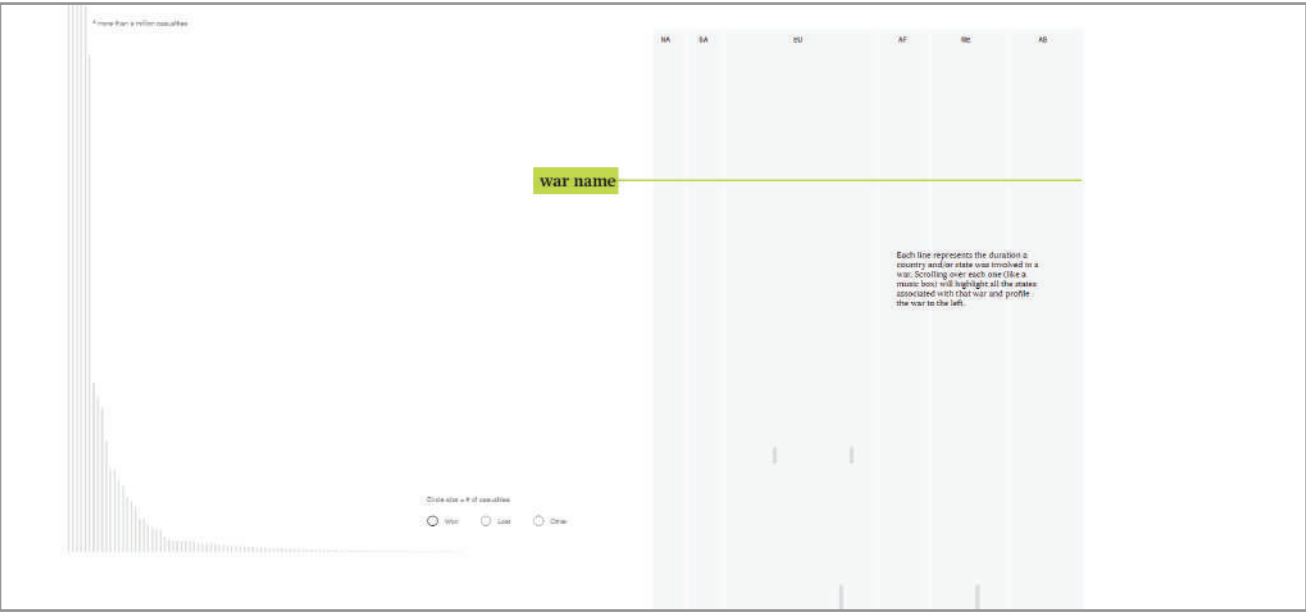

MICMIC: AI Face-Swapping Services

MICMIC uses the cutting-edge technologies including deep learning, computer vision and the like to achieve face swapping in videos, providing users with safe and efficient video face-swapping services.

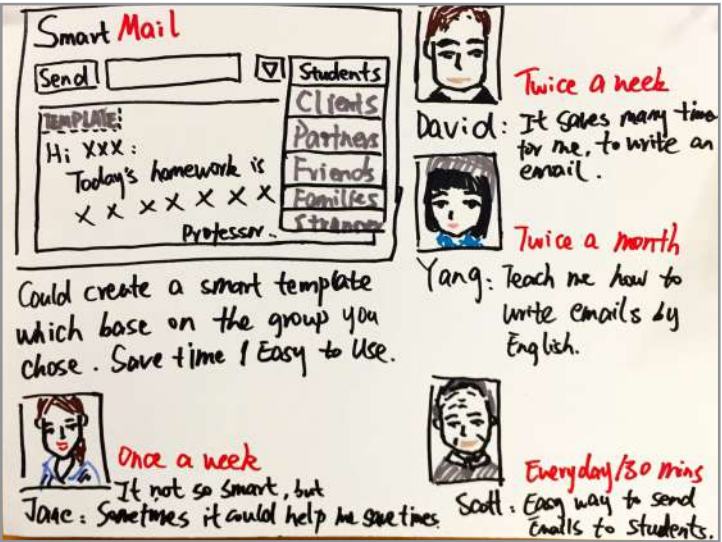

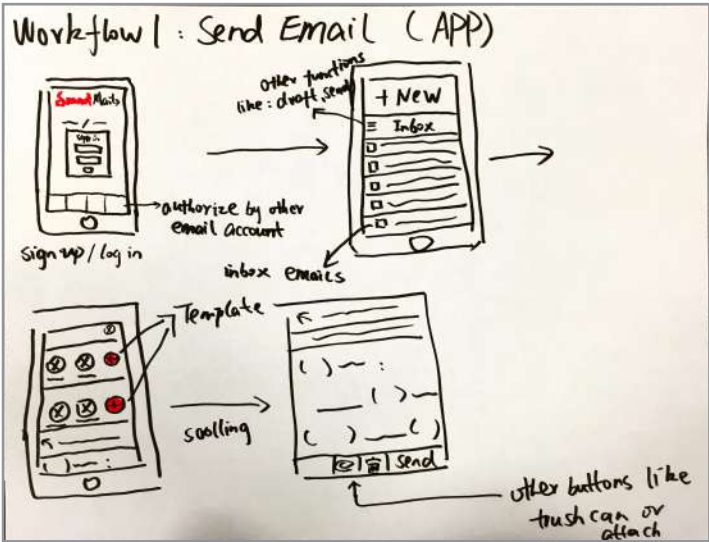

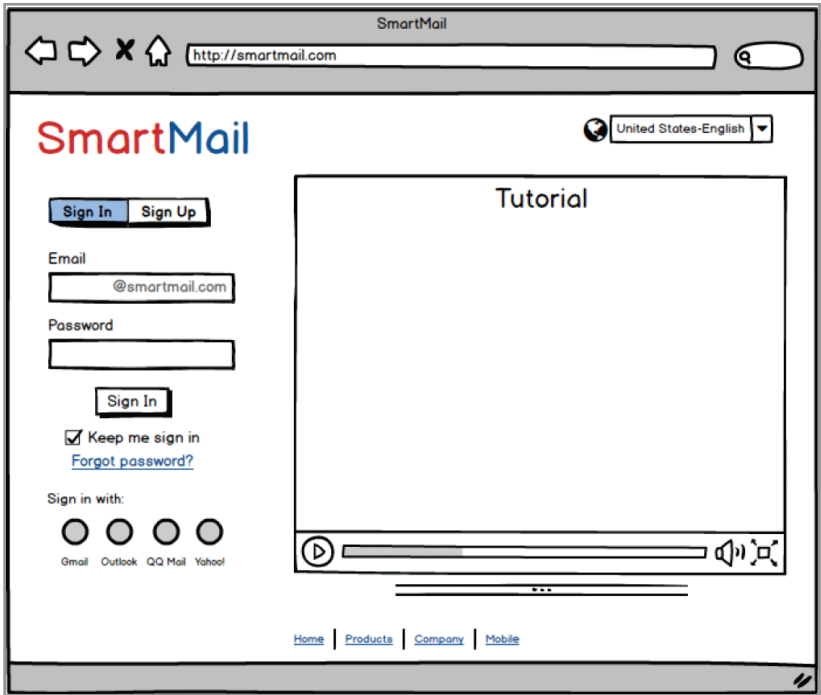

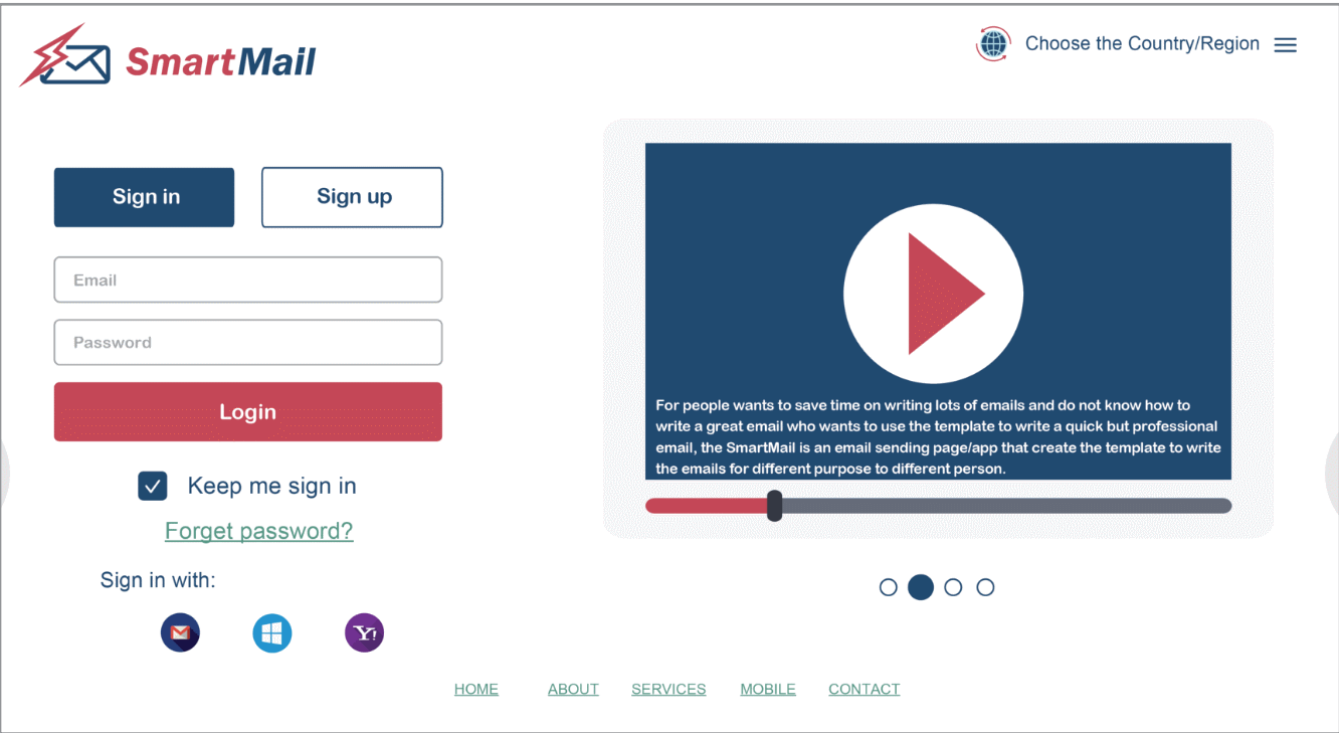

Two Hundred Years of War

Explore the last two centuries of global intra-state war.
States/countries are divided into the six regions.
Principle designers / developers: Ryan Morrill & Xinhe Yu

UI Designand Prototype Mockups: SmartMail

UI Design: SmartMail website and Mobile prototype on InVision, and Digital Wireframes on Balsamiq.

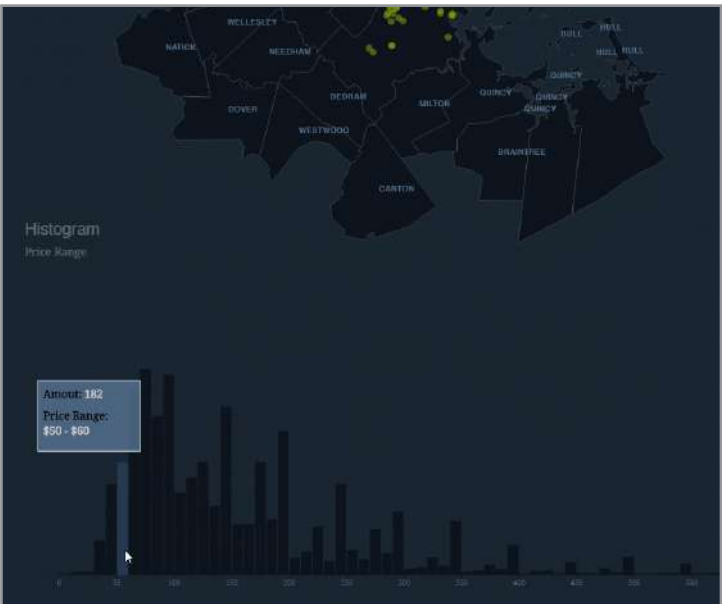

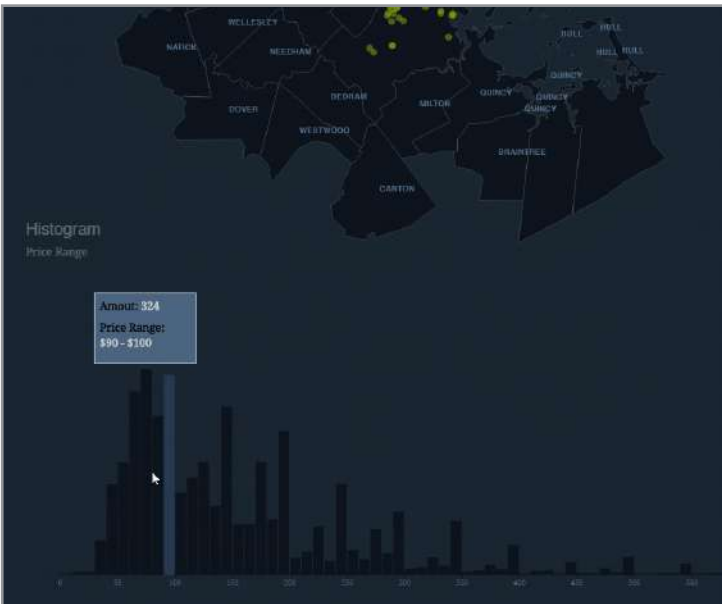

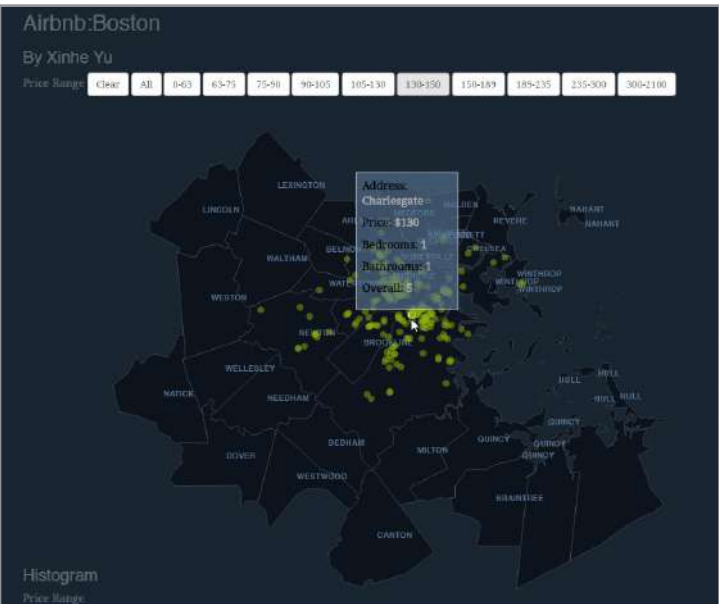

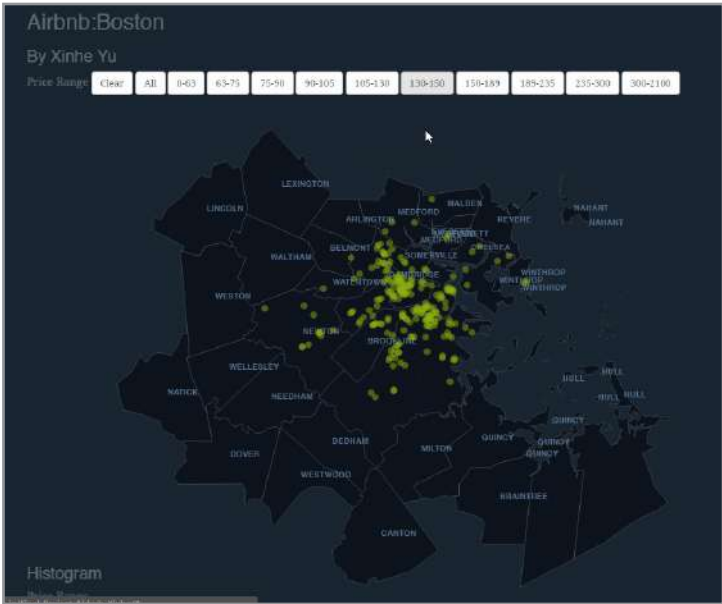

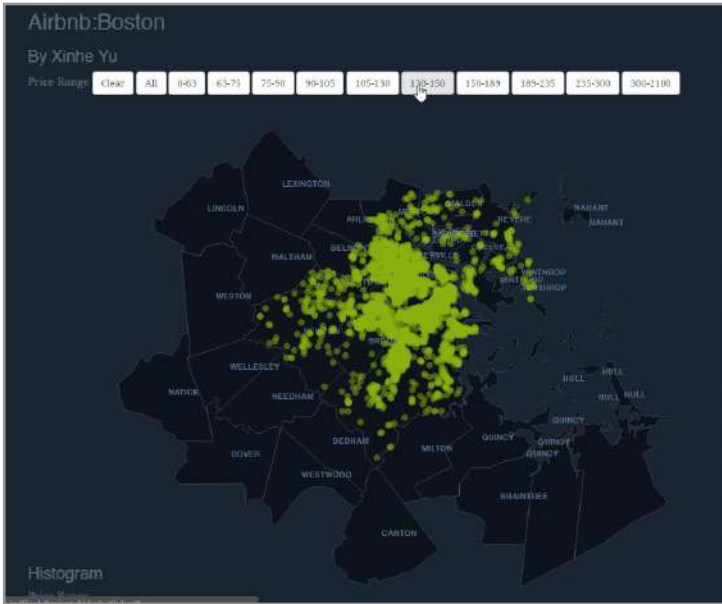

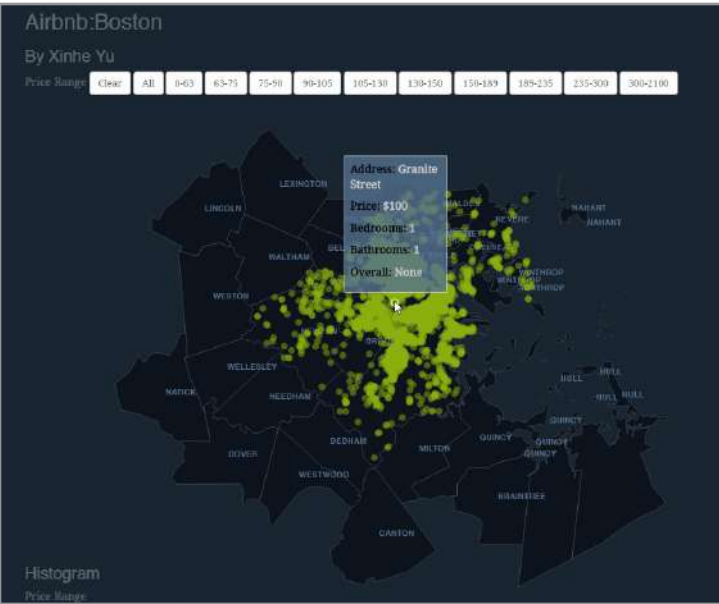

UX Design: Fall Finder Application

Design for Behavior and Experience: Waiting for limitation. This Project includes: Research, Project Development Process, Project Narrative, Systems Diagram, Illustration Of Visual Artifacts and Interaction Scenarios (Video).

Airbnb:Boston

Using the data from Airbnb Boston to design the interactive visualization web page that could better show the information.

UNESCO World Heritage Site: Yellowstone (Publications)

This project designs an inter-related group of projects (design of identity, information, and publication projects, also focus on cross-platform (print, digital, and three-dimensional) manifestations - all based on a single area of content.)

UNESCO World Heritage Site: Yellowstone (Info Page and Intro Web Page)

This project designs an inter-related group of projects (design of identity, information, and publication projects, also focus on cross-platform (print, digital, and three-dimensional) manifestations - all based on a single area of content.)

UNESCO World Heritage Site: Yellowstone National Park (United States of America)

Yellowstone National Park is America's first and foremost National Park, drawing over three million visitors yearly. Established in **1872** by the United States Congress "for the preservation of" its many wonders and "for the enjoyment of the people," and now encompassing **2.2** million acres.

The Park has five entrances and some **370** miles of paved roadway. Situated in the northwest corner of the Wyoming frontier, Yellowstone is a treasure that inspires awe in travelers from around the world, boasting more geysers (about **250** active geysers from amidst **10,000** total thermal features) than anywhere else on the globe.

Yellowstone is home to thousands of active thermal features, including the world renowned Old Faithful Geyser. Yellowstone is also known for the spectacular Grand Canyon of the Yellowstone, which is **1200** feet deep and highlighted by the powerful Lower Falls.

Yellowstone is also pristine mountain-range wilderness and an open refuge for wildlife, including grizzly bear, elk, American bison, moose and wolf.
